## WALMER RD.

During my Internship with Lauren Elizabeth Interiors, our client on Walmer Dr. requested a kitchen makeover as part of their renovation. Our goal in this kitchen was to update and gut the kitchen to achieve their dream space that was traditional with a pop of flare. This was to be their last home so they wanted a timeless but elegant kitchen. We went through many different design concepts and chose a neutral tone. We used gold and black hardware throughout the space. Images one and two are renderings made through SketchUp and escape to give the clients an idea of which backsplash to pair with the contrasting upper and lower cabinets.
